

Turf Blue®Pro Seed Product Information Sheet

If you want to use a Kentucky bluegrass on your lawn, sports field, or golf course, Turf Blue®Pro is the right choice for you. Turf Blue® Pro is a high performing 4-variety blend of Kentucky bluegrass designed to deliver on all desirable traits, powered by the high NTEP ranking variety, Barserati. This blend is quick to germinate with fast establishment, excels in traffic tolerance and recovery, and is very disease resistant. With early spring green up and strong summer performance with high heat and drought tolerance, the fine textured Turf Blue®Pro can be counted on to provide year-round bluegrass quality. AVAILABLE IN SEED ONLY.

Things to know about Turf Blue®Pro:

- Beautiful dark green color
- Thin blades that create a dense, thick lawn that is soft to the touch
- Superior wear tolerance once established
- Ability to rapidly repair itself and fill in gaps
- Great for golf courses, sports fields, parks, and residential yards
- Germinates – 10-12 days and usually completed by 21 days
- High heat & drought tolerance
- Resistant to dollar spot, summer patch & stem rust , among other diseases
- Can be mowed from 1/2" to 3" high (2-3" is recommended)

Things to consider if choosing Kentucky bluegrass for your project:

- It requires full sun to minimum shade. If your yard is mostly in the shade then Turf Blue®Pro would not be the right choice for you
- It thrives well with a deep enriched soil bed. If your soil has a lot of sand or clay than Turf Blue®Pro would not be the right choice for you
- Requires a consistent watering and fertilizer schedule so irrigation systems are extremely helpful
- Overall care and maintenance: Moderately High

Barenbrug Seed Breakdown:

	Purity
Barserati Kentucky Bluegrass	25%
Barrister Kentucky Bluegrass	25%
Barduke Kentucky Bluegrass	25%
Barrari Kentucky Bluegrass	25%

There are slight variations on different Turf Blue Pro seed lots, but overall the percentages and varieties are very similar.
